

PropMetrik How-To Guide

The comprehensive real estate platform for the Ghanaian market.

PropMetrik provides institutional-grade tools for valuations, project management, property management, deal/CRM management, data analytics, e-signatures, and more -- all within a single unified platform.

This guide walks you through every module, feature by feature, so you can get the most out of PropMetrik from day one.

Table of Contents

#	Chapter	Description
01	Authentication & Onboarding	Sign up, log in, SSO, password recovery, and initial setup
02	Dashboard & Navigation	Main dashboard, market intelligence ticker, profile, notifications, calendar, and portfolio overview
03	Project Management	Full construction project lifecycle -- create projects, schedule, team, bids, RFIs, submittals, site logs, checklists, punch lists, safety, meetings, drawings, procurement, transmittals, timesheets, equipment, contractors, change orders, closeout, units, cost estimator, audit log, settings, analytics, reports, and issues
04	Budget & Cost Management	Project budgets, cost tracking, cost codes, variance analysis, and Xero integration
05	Property Management	Portfolio management, buildings, units, leases, rent collection, and maintenance
06	Tenant Portal	Tenant self-service -- lease viewing, rent payments, maintenance requests, and messaging
07	Valuations	Property valuations, comparable sales analysis, automated valuation models, and report generation
08	Deals & CRM	Deal pipeline, contacts, properties, lead management, and transaction tracking
09	E-Signatures	Digital document signing, envelope creation, templates, and audit trails
10	Financial Services	Invoicing, payment schedules, draws and pay applications, and financial reporting
11	Data Hub & Analytics	Market data catalog, construction cost indices, economic indicators, and data ingestion
12	Integrations	Xero, WhatsApp, third-party API keys, and marketplace connectors
13	Admin & Compliance	Organization settings, RBAC, compliance reports, publications, and customer success tools

14	Reporting & Analytics	Cross-module reporting, analytics dashboards, affordability analysis, construction insights, and risk assessment
----	---	--

How to Use This Guide

- **New users:** Start with Chapter 01 (Authentication) and Chapter 02 (Dashboard) to get oriented.
- **Project managers:** Jump to Chapter 03 (Project Management) and Chapter 04 (Budget & Cost) for construction workflows.
- **Property managers:** Focus on Chapter 05 (Property Management) and Chapter 06 (Tenant Portal).
- **Valuers:** Begin with Chapter 07 (Valuations) and Chapter 11 (Data Hub).
- **Administrators:** See Chapter 13 (Admin & Compliance) for organization-level configuration.

Tip: Each chapter includes annotated screenshots. The screenshots are located in the `screenshots/` subfolder of each chapter directory.

Platform Requirements

- **Browser:** Chrome, Firefox, Safari, or Edge (latest two versions)
 - **Internet:** Stable broadband connection recommended
 - **Mobile:** Progressive Web App (PWA) support -- add PropMetrik to your home screen for offline access to key features
-

PropMetrik -- Institutional-grade real estate intelligence for Ghana and beyond.
