Simplified Publication Architecture

Two Products. One Weekly. Three Cadences.

Revised February 2026

The Simplified Model: Two Publication Products

Your existing architecture lists 15+ separate publication titles across 6 cadences — creating production overhead, audience confusion, and a fragmented website experience. The revised model collapses everything into two clearly defined products that together cover all your analytics, all your content, and all your cadences.

PRODUCT 1	PRODUCT 2
Ghana Real Estate Outlook The Comprehensive Report Published Monthly, Quarterly & Annually A single branded report product in three editions. All your analytics, indices, sector data, and forecasts — combined into one authoritative publication at each cadence.	Ghana Property Snapshot The Weekly Market Brief Published Every Monday A lean, scannable weekly brief. One lead article or market story, key data updates from that week, and a curated chart. Keeps your audience engaged between the big reports.

Product 1 — Ghana Real Estate Outlook

The Comprehensive Report: Monthly · Quarterly · Annual

One report name. Three editions distinguished only by depth and cadence. A reader who receives the Monthly Outlook knows exactly what to expect. When they receive the Quarterly, it is the same familiar product — just broader and deeper. The Annual is the definitive edition of the same publication, not a separate title.

Edition	Cadence	Depth	Audience
Monthly	1st of each month	8–14 pages. All indices refreshed. National snapshot with key sector moves. 3-month outlook.	Subscribers, journalists, general professional
Quarterly	Jan · Apr · Jul · Oct	20–30 pages. Deep sector analysis, regional breakdowns, investment outlook, risk matrix.	Institutional investors, banks, fund managers, government
Annual	January (full-year edition)	50–80 pages. Full-year review, 10-year ML forecast, Ghana Horizons regional benchmarking, wealth & luxury appendix.	Board-level, embassies, international institutions, media

Report Structure — All Three Editions

All three editions share the same section architecture. Monthly editions include all sections in concise form. Quarterly editions expand each section with deeper analysis. The Annual adds two exclusive appendices.

#	Section — What It Contains
01	Executive Summary 3–5 key findings. Biggest data move of the period. At-a-glance index dashboard (GHPI, CCI, GHAI, GCPI, PSI). Investment thesis in 3 paragraphs.
02	Macroeconomic Context GDP growth, inflation, GHS/USD, Bank of Ghana policy rate. How macro conditions are moving real estate. Auto-pulled from BoG and GSS APIs.
03	Residential Market Ghana House Price Index (GHPI) update. Sales and rental price trends by region. Affordability (GHAI). Mortgage market. New supply pipeline.
04	Commercial Market Office vacancy rates and prime rents. Retail performance. Co-working uptake. Ghana Commercial Property Index (GCPI) update.
05	Construction & Development Construction Cost Index (CCI) — materials, labour, overhead. Building permits issued. Active development pipeline. Regional project tracker.
06	Investment & Capital Markets

	Transaction volumes. Yield benchmarks. FDI flows. Diaspora Investment Index (DII). Capital Markets Review. Cap Rate Tracker.
07	Regional Snapshots Accra · Kumasi · Takoradi: each city gets a 1-page data panel — prices, rents, vacancy, construction activity, investment highlights, 3-month outlook.
08	Risk & Resilience Ghana Property Risk Score (GPRS) by region. Title security, flood risk, regulatory outlook. Best/Base/Worst scenario matrix.
09	Outlook & Forecasts 6-month forward view (Monthly). 12-month with sector projections (Quarterly). ML-powered 10-year price forecast (Annual only).
10	Methodology & Disclaimer Index methodologies, data sources, confidence intervals, RICS compliance note, legal disclaimer.

Annual Edition — Two Exclusive Appendices

Appendix A — Ghana Horizons: Pan-African Benchmarking

Ghana's performance benchmarked against Nigeria, Kenya, South Africa, and Côte d'Ivoire. Diaspora capital flow analysis. International investor positioning. Designed for development finance institutions and global fund managers.

Appendix B — Wealth & Luxury Property Review

Premium residential market analysis. High-net-worth buyer profiles. Luxury price bands by neighbourhood. HNWI investment patterns. PropTech & innovation commentary.

What This Replaces — Consolidation Map

The following publications from the original architecture are absorbed into the Ghana Real Estate Outlook. Nothing is lost — all the data and analysis is preserved, simply delivered inside one coherent product instead of as separate files.

Original Publication	Old Cadence	Now Lives In
Ghana Property Snapshot	Monthly	Section 01 — Executive Summary (Monthly edition)
Ghana Real Estate Perspective	Monthly	Full Monthly Outlook edition
Construction Cost Index (CCI) Update	Monthly	Section 05 — Construction & Development
Regional MarketBeats (Accra/Kumasi/Takoradi)	Monthly	Section 07 — Regional Snapshots
Ghana Housing Affordability Report	Quarterly	Section 03 — Residential Market (Quarterly edition)
Capital Markets Review	Quarterly	Section 06 — Investment & Capital Markets (Quarterly)
Investment Forecast	Quarterly	Section 09 — Outlook & Forecasts (Quarterly edition)

Ghana Quarterly Outlook	Quarterly	Full Quarterly Outlook edition
Ghana Real Estate Investment Forecast	Semi-Annual	Section 06 & 09 expanded (Q2 & Q4 editions)
Ghana Real Estate Market Outlook	Annual	Full Annual edition
Ghana Horizons Report	Annual	Annual Appendix A — Ghana Horizons
Ghana Wealth & Luxury Report	Annual	Annual Appendix B — Wealth & Luxury
Ghana PropTech & Innovation Report	Annual	Annual Appendix B + Section 09 commentary
Policy Papers	Ad-hoc	Standalone downloads (not part of Outlook cadence)

Product 2 — Ghana Property Snapshot

The Weekly Brief: Every Monday 8AM GMT

The Snapshot is your high-frequency, always-on publication. It is short, scannable, and data-forward — designed to be read in under 5 minutes and to keep your audience engaged every week between the major report editions. Think of it as your weekly pulse on the Ghana property market.

The Snapshot is NOT a mini version of the Outlook.

It is a distinct format: one focused angle per week — a single market story, chart, or data event — written tightly and distributed via email and web. It drives subscribers back to the full Outlook reports.

Snapshot Structure — Fixed Every Week

The Snapshot uses a locked template. Every edition is identical in structure so readers always know where to look. Total length: 400–600 words plus charts.

Block	What It Contains — Fixed Template
01	This Week's Lead One market story or data event. Could be a CCI move, a major transaction, a policy announcement, or a trend emerging from the data. Written as a 200-word article with a single chart.
02	Index Pulse A 4-cell data panel showing the week's most-moved indices: GHPI, CCI, PSI (Sentiment), and one rotating index. Each cell shows: current value, weekly change, and a 4-week sparkline.
03	Chart of the Week One standout chart pulled from the analytics engine. Could be a price heatmap, a CCI regional comparison, an affordability trend, or a forecast cone. 2-sentence AI-written caption.
04	What to Watch Three bullet points. Upcoming data releases, policy decisions, or market events that readers should track in the coming week. Written in plain language — no jargon.
05	From the Archive A one-line teaser linking back to the most relevant Outlook report or article. Drives report readership. Rotated editorially.

Weekly Content Logic — What Gets Featured

The Snapshot rotates its lead focus across the week's data cycle so that no two consecutive editions feel repetitive. The following rotation is the default — it can be overridden whenever a significant market event demands coverage.

Week	Lead Focus	Typical Data Source / Trigger
Week 1	Construction & Costs	Fresh CCI update (published 5th of month). Materials, labour, overhead moves. Development pipeline.

Week 2	Residential Market	GHPI update, rental price trends, affordability data from GHAI. Housing supply pipeline.
Week 3	Investment & Capital	Transaction volumes, yield moves, cap rate tracker, diaspora flows, FDI signals.
Week 4	Economy & Outlook	Macro indicators: BoG rate, GHS/USD, inflation. Sentiment Index (PSI). Forward-looking commentary.
Ad-hoc	Breaking Market Event	Major transaction, policy announcement, index spike, or data anomaly triggers an immediate Snapshot.

Publication Calendar — Full Year View

With two products across four cadences, the annual schedule is predictable and manageable. The calendar below shows every publication event in a typical year.

Month	Weekly Snapshots	Monthly Outlook	Quarterly Outlook	Annual Outlook
January	4 editions	Monthly Outlook	Q4 Quarterly Edition	✦ Full Annual Edition
February	4 editions	Monthly Outlook	—	—
March	4 editions	Monthly Outlook	—	—
April	4 editions	Monthly Outlook	Q1 Quarterly Edition	—
May	4 editions	Monthly Outlook	—	—
June	4 editions	Monthly Outlook	—	—
July	4 editions	Monthly Outlook	Q2 Quarterly Edition	—
August	4 editions	Monthly Outlook	—	—
September	4 editions	Monthly Outlook	—	—
October	4 editions	Monthly Outlook	Q3 Quarterly Edition	—
November	4 editions	Monthly Outlook	—	—
December	4–5 editions	Monthly Outlook	—	—

Total annual publications: ~65 items

52 Weekly Snapshots · 12 Monthly Outlooks · 4 Quarterly Outlooks · 1 Annual Outlook

What Stays Separate

Publications Outside the Two-Product Model

Three content types do not fold into the Outlook or the Snapshot. They have distinct audiences, irregular cadences, or require human initiation, so they sit outside the automated publication cycle.

Publication	Cadence	Why It Stays Separate
Policy Papers	Ad-hoc	Commissioned or event-driven. Formal PDF format for government and BoG. Cannot be auto-generated from market data alone — requires analyst authorship and institutional framing.
Press Releases	Ad-hoc	Company and product announcements. Require human initiation and editorial approval. Live in the Press Room, not the Insights section.
Podcast — PropMetrik Perspectives	Weekly (Thursday)	Audio format with a distinct production workflow. Covers similar themes to the Snapshot but is a conversation, not a data report. Cross-references the weekly Snapshot for listener continuity.

Indices — Embedded, Not Published Separately

Your nine proprietary indices (GHPI, GHAI, CCI, GCPI, GPRS, GMTI, PSI, DII, Cap Rate Tracker) are not standalone publications in this model. They feed into the reports.

Index	Update Cadence	Appears In	Public-Facing
Ghana House Price Index (GHPI)	Monthly	Monthly Outlook § 03	Headline number on website + Snapshot Index Pulse
Construction Cost Index (CCI)	Monthly	Monthly Outlook § 05	Headline + Snapshot (Week 1 lead)
PropMetrik Sentiment Index (PSI)	Weekly	Snapshot Index Pulse	Live ticker on website homepage
Ghana Housing Affordability (GHAI)	Quarterly	Quarterly Outlook § 03	Headline number + chart on /indices page
Ghana Commercial Property (GCPI)	Quarterly	Quarterly Outlook § 04	Headline + chart on /indices page
Ghana Property Risk Score (GPRS)	Quarterly	Quarterly Outlook § 08	Risk map on /indices page
Diaspora Investment Index (DII)	Quarterly	Quarterly Outlook § 06	Headline + chart on /indices page
Ghana Cap Rate Tracker	Semi-annual	Q2 & Q4 Outlook § 06	Chart on /indices page (Professional tier)

Ghana Market Transparency (GMTI)	Annual	Annual Outlook § 10	Full methodology paper (public download)
----------------------------------	--------	---------------------	--

Website Navigation & Footer — Revised

With two clear products, the website navigation collapses from a sprawling multi-tier menu into a clean, audience-legible structure. Visitors immediately understand what they can read and how often.

Main Navigation

Nav Item	Sub-items & Purpose
Insights	Latest (all recent publications feed) · Ghana Real Estate Outlook (report hub: Monthly / Quarterly / Annual) · Weekly Snapshot (archive + subscribe) · Indices & Data (/indices live page)
Topics	Economics & Policy · Investment & Capital Markets · Affordability & Housing · Construction & Development · Sustainability & ESG · PropTech · Urbanization · Diaspora · Risk · Wealth & Luxury
Sectors	Residential Sales · Residential Lettings · Office · Retail · Industrial & Logistics · Hospitality · Land · Infrastructure & Mixed-Use · Healthcare & Education
Data Terminal	Live Market Tickers · Price Heatmaps · Investment Analytics · Comparables · Index Dashboard (Professional subscribers)
Press & Media	Press Releases · In the Media · Media Kit · Data for Journalists · Expert Commentary
Events	Upcoming Webinars · Past Webinars · Podcast Archive (PropMetrik Perspectives)

Footer Structure

The footer reflects the same two-product clarity. Visitors scanning the footer understand the full PROPMETRIK content offering in one glance.

Summary — Before & After

This table shows at a glance how the simplified model reduces production overhead while preserving every piece of content and analysis in your original architecture.

Before — Original Architecture	After — Simplified Two-Product Model
• 15+ named publication titles • 6 separate cadences to manage • Separate annual reports for PropTech, Wealth & Luxury, Horizons • Separate quarterly titles for Capital Markets, Investment Forecast, GHAI • Separate monthly titles for CCI, MarketBeats, Snapshot, Perspective • Index updates published as standalone posts • Fragmented website navigation • Audience confusion about what to read	• 2 named products — easy to brand, easy to promote • 4 cadences: Weekly · Monthly · Quarterly · Annual • Annual appendices fold Horizons + Wealth into one edition • Quarterly editions absorb all quarterly sub-reports • Monthly editions absorb all monthly sub-reports • Indices surface as data panels inside reports + live /indices page • Clean 6-item main navigation • Reader always knows: read the Snapshot weekly, the Outlook monthly

The north star: Every piece of data, every index, every sector analysis you produce feeds one of two places — the Ghana Real Estate Outlook or the Ghana Property Snapshot. Nothing is orphaned. Nothing is redundant.
