

Chapter 10 -- Financial / Invoicing

Overview

PropMetrik consolidates financial management across every module -- Billing & Subscriptions, Project Management invoices, Deal commissions, Valuation fee tracking, and Property Management rent collection - into a unified set of financial tools. All values are denominated in Ghana Cedis (GHS / GH¢) by default, with multi-currency support for international transactions.

This chapter covers the six financial surfaces in the platform:

1. **Billing & Subscriptions** -- your PropMetrik subscription and usage metering.
2. **Project Invoices** -- construction project billing with draw schedules and pay applications.
3. **Project Financials** -- budget vs. actual cost tracking with Xero sync.
4. **Valuation Finance** -- fee schedules, billing for valuation assignments.
5. **Deal Financials** -- commission payouts, revenue forecasting, payment configuration.
6. **Property Management Financials** -- rent collection, arrears, landlord statements.

10.1 Billing & Subscriptions

Navigate to **Dashboard > Billing** to manage your PropMetrik subscription.

Current Plan

The top section displays your active subscription:

- **Plan Name** -- the tier you are on (Starter, Professional, Enterprise).
- **Billing Interval** -- monthly or annual.
- **Price** -- in GH¢ per month or per year.

- **Status** -- active, trial, past due, or cancelled.
- **Current Period** -- start and end dates of the current billing cycle.
- **Trial** -- if on a trial, the expiry date is shown.

Usage Metrics

A set of progress bars show how much of your plan limits you have consumed:

Metric	Description
Users	Team members vs. plan limit
Properties	Managed properties vs. limit
Projects	Active construction projects vs. limit
Deals	Active CRM deals vs. limit
Valuations	Valuation reports created vs. limit
Storage	Document storage used vs. limit
API Calls	API requests this period vs. limit

Each bar turns amber at 80% and red at 95% utilisation.

Add-ons

Optional modules that extend your plan:

- Extra user seats
- Additional storage
- Advanced analytics
- WhatsApp integration
- API access

To add or remove add-ons:

1. Scroll to the **Add-ons** section.
2. Click **Manage** next to the add-on.
3. Adjust the quantity.
4. Confirm the change -- billing is prorated.

Payment History

A table of past invoices with:

- Invoice date
- Amount in GH¢
- Status (Paid, Pending, Failed)
- Download link for receipt PDF

Payment Method

Configure your payment method:

- **Paystack** -- card payments via Paystack (the primary provider for Ghana).
- **Bank Transfer** -- manual bank transfer with reference number.

- **Mobile Money** -- MTN MoMo, Vodafone Cash, AirtelTigo Money.

10.2 Project Invoices

Navigate to **Projects > Invoices** or use the **Invoice Builder** for construction project billing.

The screenshot shows the PROPMETRIK interface for the 'Invoices' section. At the top, there's a navigation bar with tabs for Overview, Construction, Procurement, Financials, Documents, Units, Analytics, and Settings. The 'Invoices' section is active, showing a project selection dropdown for 'East Legon Executive Villas'. Below this, there are four summary cards: 'Total Invoiced' (GH¢478,125.00), 'Paid' (GH¢0.00), 'Pending' (GH¢478,125.00), and 'Overdue' (GH¢0.00). A search bar and a filter dropdown are present. The main table lists invoices with columns: Invoice #, Vendor, Amount, Due Date, and Status. One invoice is shown: INV-2026-001, Vendor, GH¢425,000.00, Due Date 10 Apr 2026, Status Pending.

Invoice List

The invoices page shows all project invoices with:

- Invoice number (auto-generated sequence)
- Project name
- Client / contractor name
- Amount in GH¢
- Status badge (Draft, Sent, Partially Paid, Paid, Overdue, Voided)
- Due date
- Payment reference (Paystack reference if paid online)

Creating an Invoice

1. Click **+ New Invoice** or navigate to **Projects > Invoice Builder**.
2. Select the **Project** from the dropdown.
3. Choose the **Invoice Type**:
 - **Progress Payment** -- based on percentage of work completed.
 - **Milestone Payment** -- tied to a specific project milestone.
 - **Retention Release** -- release of held-back retention funds.
 - **Variation / Change Order** -- additional work outside original scope.
 - **Final Account** -- closing invoice for project completion.
4. Add **Line Items**:

- Description of work
 - Quantity
 - Unit price
 - Amount (auto-calculated)
5. Apply **Retention** (typically 5--10% withheld until defects liability period).
 6. Add **Taxes** (VAT, NHIL, COVID levy as applicable in Ghana).
 7. Set the **Due Date**.
 8. Add **Notes** or terms.
 9. Click **Save as Draft** or **Send** to dispatch to the client.

Invoice Actions

Action	Description
Edit	Modify a draft invoice
Send	Email the invoice to the client
Record Payment	Log a manual payment received
Download PDF	Export the invoice as a PDF
Void	Cancel the invoice
Duplicate	Create a copy for the next billing period

Draw Schedule / Pay Applications

For construction projects, the draw schedule tracks planned disbursements against actual payments:

1. Navigate to **Projects > [Project] > Draws / Pay Apps**.
2. View the schedule of planned draws aligned to construction phases.
3. Submit a **Pay Application** for each draw:
 - Current work completed this period
 - Materials stored on site
 - Less retention
 - Less previous payments
 - Net amount due
4. The client reviews and approves or rejects the application.
5. Approved amounts become payable invoices.

Tip: Link invoices to Change Orders so you can trace every billing item back to its authorisation.

10.3 Project Financials

Navigate to **Projects > Financials** or open a specific project and go to **Budget & Cost**.

Budget vs. Actual

The financials dashboard provides a real-time view of project financial health:

- **Original Budget** -- the initial approved budget.
- **Revised Budget** -- budget after approved change orders.
- **Committed Costs** -- purchase orders and subcontracts issued.
- **Actual Costs** -- invoices received and payments made.
- **Variance** -- difference between budget and actual (green = under, red = over).
- **% Complete** -- financial percentage complete.
- **Estimated at Completion (EAC)** -- projected total cost.
- **Estimate to Complete (ETC)** -- remaining costs.

Cost Categories

Costs are broken down by category:

Category	Examples
Materials	Cement, steel, timber, sand, tiles
Labour	Skilled and unskilled labour, overtime
Equipment	Crane hire, scaffolding, tools
Subcontractors	Electrical, plumbing, painting
Professional Fees	Architect, engineer, surveyor
Permits & Fees	Building permits, utility connections

Overhead	Site office, insurance, security
Contingency	Risk allowance

Adding a Cost

1. Click **+ Add Cost**.
2. Select the **Cost Category** from the dropdown.
3. Enter the **Description, Vendor, Amount, and Date**.
4. Attach a receipt or invoice document (optional).
5. Click **Save**.

Xero Integration

PropMetrik syncs project costs with Xero accounting software:

1. Navigate to **Projects > Integrations** or the Xero settings panel.
2. Click **Connect to Xero** to start the OAuth2 flow.
3. Authorise PropMetrik to access your Xero organisation.
4. Once connected, you can:
 - **Sync Costs** -- push project costs to Xero as bills or invoices.
 - **Map Contacts** -- link PropMetrik vendors to Xero contacts.
 - **Track Status** -- see sync status with timestamps and error logs.

Each cost record shows a Xero sync badge indicating whether it has been synced, is pending, or failed.

Tip: Set up automatic sync to push new costs to Xero daily, reducing manual data entry and ensuring your accounting records stay current.

10.4 Valuation Finance

Financial tracking for valuation assignments and fee billing.

Fee Schedules

Configure fee schedules based on property type and valuation purpose:

Property Type	Market Value	Insurance	Mortgage	Rent Review
Residential	GH¢ 2,500	GH¢ 1,800	GH¢ 2,000	GH¢ 1,500
Commercial	GH¢ 5,000	GH¢ 3,500	GH¢ 4,000	GH¢ 3,000
Industrial	GH¢ 8,000	GH¢ 6,000	GH¢ 7,000	GH¢ 5,000
Land	GH¢ 3,000	--	GH¢ 2,500	--

Fees are guidelines -- you can override them per assignment.

Billing a Valuation

1. Open a valuation report.
2. Navigate to the **Finance** tab.
3. The system pre-fills the fee based on property type and purpose.
4. Adjust the fee if needed (discounts, complexity surcharges).
5. Click **Generate Invoice** to create a billing record.
6. The invoice can be sent to the client via email or printed.

Revenue Tracking

The valuation finance dashboard shows:

- Total revenue this month/quarter/year
- Revenue by valuer (performance leaderboard)

- Outstanding fees (unpaid invoices)
- Fee collection rate (percentage of billed fees collected)
- Revenue trend chart

10.5 Deal Financials

Navigate to **Deals > Financials** for the CRM financial centre.

Overview Tab

Summary cards show:

- **Total Pipeline Value** -- sum of all active deal values.
- **Won Revenue** -- closed-won deal values for the period.
- **Pending Commissions** -- commissions calculated but not yet paid.
- **Paid Commissions** -- commissions disbursed to agents.

Below the cards, a revenue breakdown chart shows deal value by:

- Deal type (Sale, Rental, Development)
- Pipeline stage
- Agent
- Time period

Payment Settings Tab

Configure how commissions and deal-related payments are processed:

1. Select the **Payment Provider**:
 - Paystack (automatic card/mobile money payouts)

- Bank Transfer (manual processing)
2. Set **Payout Frequency**: weekly, bi-weekly, or monthly.
 3. Configure **Approval Workflow**: require manager approval before payout, or auto-approve.
 4. Set **Commission Calculation Rules**:
 - When to calculate (on deal won, on payment received, manual)
 - Default split percentages
 - Tiered commission structures (higher rates for higher deal values)

Forecast Tab

The AI-powered Revenue Forecaster uses your pipeline data to project future revenue:

- **Weighted Pipeline** -- deal values multiplied by stage probabilities.
- **Monthly Forecast** -- expected closings per month based on deal velocity.
- **Best / Worst / Expected Cases** -- three scenario projections.
- **Confidence Interval** -- statistical range for the forecast.

The forecaster accounts for:

- Historical conversion rates by stage
- Average deal cycle length
- Seasonal patterns in the Ghanaian real estate market
- Agent-specific performance trends

***Tip:** Keep your pipeline stages' probability percentages accurate -- they directly feed the revenue forecasting model.*

10.6 Property Management Financials

Navigate to **Property Management > Financials** for rent collection and landlord accounting.

Rent Collection Dashboard

- **Expected Rent** -- total rent due this month across all managed properties.
- **Collected** -- rent received to date.
- **Outstanding** -- unpaid rent (arrears).
- **Collection Rate** -- percentage of expected rent collected.
- **Advance Payments** -- rent paid ahead of schedule.

Arrears Management

A table of overdue rent payments with:

- Tenant name and unit
- Amount overdue
- Days overdue
- Last payment date
- Contact information
- Action buttons: Send Reminder, Record Payment, Escalate

To send a rent reminder:

1. Select one or more tenants with arrears.
2. Click **Send Reminder**.
3. Choose the communication channel: Email, SMS, or WhatsApp.
4. Review the auto-generated reminder message.
5. Click **Send**.

Landlord Statements

Generate monthly or periodic financial statements for property owners:

1. Select the **Property** and **Period**.
2. The system compiles:
 - Gross rent collected
 - Less management fees
 - Less maintenance expenses
 - Less any other deductions
 - Net amount due to landlord
3. Click **Generate Statement** to create a PDF.
4. Click **Send to Landlord** to email the statement.

Payment Recording

To record a rent payment:

1. Navigate to the tenant's lease or the arrears list.
2. Click **Record Payment**.
3. Enter:
 - Amount received
 - Payment date
 - Payment method (Cash, Bank Transfer, Mobile Money, Cheque)
 - Reference number
4. Click **Save**.
5. The tenant's balance updates automatically.

Rent Receipts

After recording a payment, you can generate and send a rent receipt:

1. Click **Generate Receipt** on the payment record.
2. The receipt includes: tenant name, property, amount, date, method, and receipt number.
3. Click **Send** to email or WhatsApp the receipt to the tenant.

10.7 Financial Reports

Across all modules, PropMetrik provides exportable financial reports:

Report	Module	Description
Profit & Loss	Projects	Revenue vs. costs for a project
Cash Flow	Projects	Inflows and outflows by period
Aged Receivables	PM / Deals	Outstanding invoices by age bracket
Commission Statement	Deals	Agent commission summary for a period
Landlord Statement	PM	Net income statement for property owners
Fee Revenue	Valuations	Valuation fees billed and collected
Budget Variance	Projects	Budget vs. actual with variance analysis
Tax Summary	All	VAT, NHIL, and levy summary for filing

Exporting

All financial tables and reports support:

- **CSV Export** -- for spreadsheet analysis.
- **PDF Export** -- for client or management reporting.
- **Xero Sync** -- for accounting integration (project costs).

Tip: Schedule monthly financial reports using the Workflow automation to have them emailed to stakeholders on the first of each month.

Summary

PropMetrik's financial tools cover the entire lifecycle of real estate finance in Ghana -- from subscription billing and project cost management to agent commissions and rent collection. The Xero integration bridges the gap between operational and accounting systems, while the AI-powered revenue forecaster helps you plan with confidence.
